

JACK SHAW

Innovation, Technology, and the Post-Pandemic Future

Managing Disruptive Change with Dynamic Transformational Planning

As the world recovers from the COVID Pandemic, businesses are having to rethink their business models, processes, and technologies in light of on-going disruptions – not just the Pandemic, but Climate Change, geopolitical disturbances, and the impacts of emerging technologies.

What are the new kinds of business models needed to succeed in the post-pandemic world? How will you need to design your business processes to leverage remote collaboration, machine learning/AI, Blockchain, 5G/IoT, and other incipient technologies? And what does strategic planning even mean when unanticipated disruptions can stand the world on its head in a matter of weeks?

In this program, Jack Shaw shares detailed scenarios demonstrating how Digital Transformation will enable the kinds of radical innovations needed to anticipate and manage disruptive changes. And he'll describe Dynamic Transformational Planning, a proven methodology to maintain current operations and manage current and potential disruptions while still achieving long-term strategic objectives.

Jack customizes this program for specific industry verticals or business functions on request. Examples include:

- ***Innovation, Technology, and the Post-Pandemic Future of Healthcare***
- ***Innovation, Technology, and the Post-Pandemic Future of Accounting and Auditing***
- ***Innovation, Technology, and the Post-Pandemic Future of Procurement, Logistics, and Supply Chain Management***

Jack can also custom craft this presentation for technology solution providers or for professional services organizations such as CPA and law firms. All of Jack's programs can be delivered virtually, in-house to management leadership and employees, or to clients and prospects at customer conferences and marketing events.

Jack integrates his executive experience in industry, technology, and consulting to speak on Innovation, Change Management, and Transformational Leadership. And, he brings decades of experience designing, developing, and implementing emerging technologies to speak with a deep understanding of such current leading-edge technologies as Artificial Intelligence, Blockchain, 5G, and the Internet of Things and how these will impact business and society.

Jack Shaw is an Innovation and Change Management Strategist with more than 30 years' experience helping leaders transform their organizations' digital ecosystems amid new waves of technology. A Global Thought Leader, he was voted one of the World's Top 25 Speakers and one of the Top Five Technology Futurists in polls conducted by Speaking.com.

Having a sensible, practical approach to how tomorrow's new technologies will drive change and spur innovation, Jack has spoken for dozens of associations and has advised key decision-makers at such Fortune 500 organizations as Mercedes Benz, GE, Coca-Cola, Bosch, Johnson & Johnson, IBM, Oracle, and SAP.

Jack has delivered over 1,000 keynote discussions and executive forums in 26 countries and every state across the U.S. He is a Yale University graduate, and he holds a Kellogg MBA degree specializing in Finance and Marketing.
